Cthulhu

Assembly Instructions

Note: Special tools are required to build this model, which may not be suitable for children.

Tools you will need: Scissors or (preferably) a craft knife, cutting mat, ruler, PVA glue.

• Print out all four pages of the Cthulhu model on your desk top printer. For best results use a high-quality standard weight paper.

• Trim the sheets along the black line on all four sides (this will help you align the front of the sheets to the backs).

• Glue Page 1 to Page 2, Page 3 to Page 4 using a spray adhesive.

• Cut to the *inside* of the black edges of each part.

• Make folds by *gently* dragging the tip of your scissors (or knife) along the dashed lines. Practice this method on a piece of scrap paper to get the right feel.

• Make a few glue spreaders out of card scraps measuring about 10 x 50 mm. These help to apply glue evenly.
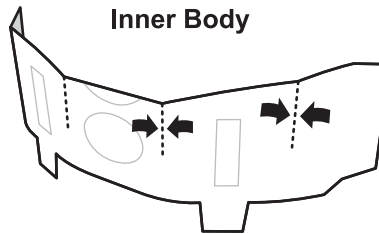

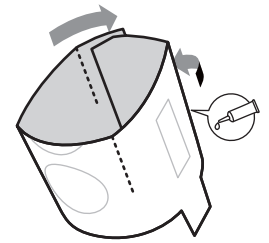

• Take your time. Cthulhu is *patient.*

Base

1a Fold down all four white glue flaps, then fold down sides of **Base**.

1b Glue flaps to the inside of **Base**.
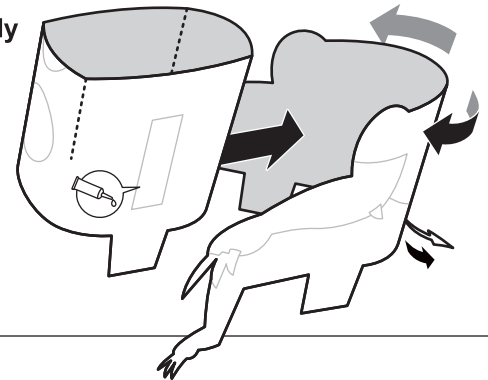

Inner Body

2a Fold **Inner Body** at fold lines to make corners.
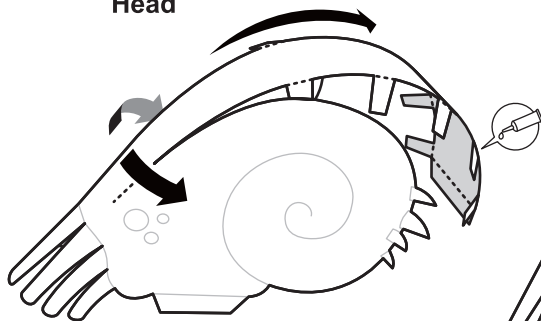

2b Fold **Inner Body** into a tube and glue.
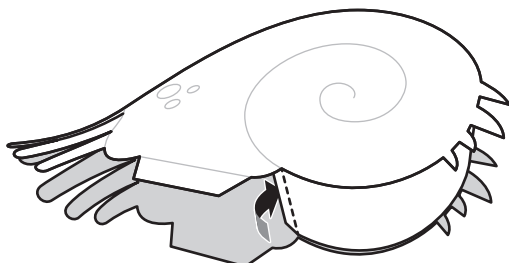

Outside Body

2c Wrap **Outer Body** around **Inner Body** and glue both sides. Curl Tail up slightly.
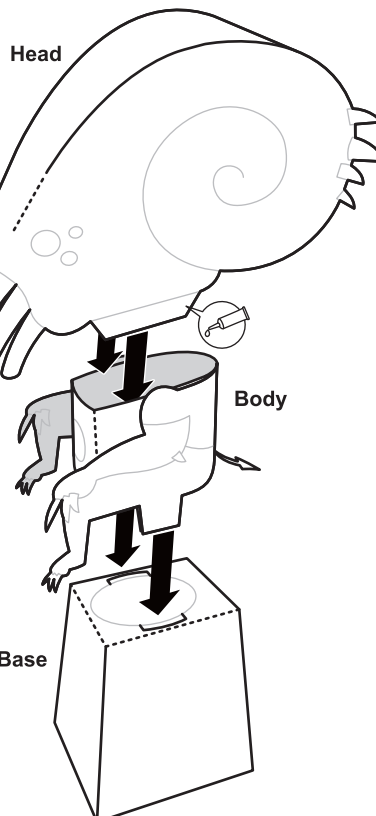

Head

**3a** Fold back both sides of Head. Curl center strip and fold in all ten small glue flaps.

3b Glue all small glue flaps to the inside of Head, then fold in the end flap.

Head

Body

Base

4 Glue both side flaps on **Head** to the inside of **Body**. Insert both side tabs of **Body** into curved slots on top of **Base**.

Wings

5 Fold back both Wings. Glue center to white square on back of Body.
